

AgroChemicals, Antimicrobials & Biocides

Our Goal: Enabling Your Freedom to Market

ARCADIS provides cradle to grave support for the development, registration, marketing and post marketing assistance of your Agricultural Chemicals, Antimicrobials and other Biocides. We directly support our clients in the performance of the due diligence necessary to enhance their position in the marketplace and meet global regulatory requirements.

Our professional staff possesses extensive experience in all stages of efficacy, field and toxicity evaluations through the development of risk assessments. In addition, we have strong understanding of the applicable regulations and have relationships with the authorities enabling us to guide your submissions smoothly through those processes.

Our lifecycle approach will provide you with a company specific strategy that meets your portfolio needs. We leverage our resources, expertise and relationships to provide you with:

- Strategies for regulatory submissions
- Formulary or application assistance
 - Traditional and GRAS formulations
 - Active and inert ingredients
- Data coordination, monitoring and review (efficacy and toxicology studies)
- Field Studies/Modeling/Spatial GIS/Remote Sensing (performance and review)
 - Risk Assessments
- Regulatory submission support
- Post production support
- Downstream user support
- Spill management and cleanup
- General product stewardship
- Expert witness support
- Project Management
